

Aufgabe 4

/ Wie löst man eine Aufgabe. */*

Download exercise sheet from ILIAS;
unzip the sheet file;

read through the content in PDF sheet;
questions_left = Questions in the sheet;

```
While questions_left != empty ;  
do  
    if current question not finished  
        code the current question;  
        if have no idea of how to solve;  
            record the confusion on Q&A list for Tutorium;  
            review the course on ILIAS for idea;  
            if still can not nail it  
                search on StackOverflow for hint.;  
            Fi  
            try solve the question;  
        fi  
    else if current question finished  
        remove it from question_left and go next one.  
    Fi sele  
od
```

```
Zip the program and rename it according to the demand  
Share the progress to teammates;  
check their idea of assignment too ;  
if everyone agree on the version of anwser  
    upload it to ILIAS  
fi  
else if someone has different idea  
    discuss and merge the team result  
fi else
```

Attend he tutorial on time;
